Design Guidelines

Accessibility: Ensure that designs comply with WCAG standards to provide an inclusive experience for all users, including those with disabilities.

Color Palette: Define primary, secondary, and accent colors, along with text colors, ensuring sufficient contrast for readability and accessibility as per WCAG guidelines.

State Colors: Specify colors for interactive states such as hover, active, and disabled, making sure these states are distinguishable for users with visual impairments.

Typography: Select font styles, sizes, and line heights that are legible and accessible, adhering to WCAG recommendations for text readability.

Spacing: Use consistent spacing units for margins, padding, and layout, ensuring that the design is clear and easy to navigate for all users.

Components: Create reusable UI components like buttons, icons, forms, and tables, ensuring that they are accessible and meet WCAG standards for interaction and visual clarity.

Design Principles: Focus on visual hierarchy, ease of use, consistency, readability, and a mobile-first approach, while ensuring WCAG compliance for a better, more accessible user experience.

Responsiveness: Design with mobile-first principles in mind. Ensure that the design adapts to various screen sizes and orientations, providing an optimal experience across devices. Use flexible grids, scalable images, and media queries to enhance responsiveness.

Lensa Yadesa

Hi there, I'm Lensa! 👋

I'm a third-year Software Engineering student passionate about solving problems through code. From web development to algorithms,I'm always learning and pushing my skills to build meaningful software solutions.

Passionate Software Engineering Student

As a third-year student, I'm dedicated to creating efficient software and exploring both front-end and back-end development.

Skills & Proficiency

Technical Skills Overview

Skills	Description
Java	Knowledgeable in Java, focusing on object oriented
Python	Familiar with Python and working towards
JavaScript	Basic understanding of JavaScript
Teamwork	Experience in collaborating with teams
Communication	Able to convey technical concepts clearly

Current Learning Focus

I am currently expanding my knowledge of web development frameworks, specifically focusing on Java's Spring framework and Python's Django.

Additional Information

- Working on both front-end and back-end development skills.
- Engaging in small web development projects to apply my knowledge.
- Continuously learning new technologies to enhance my skill set.
